# THULUNGA BASUMATARY

**Software Developer I | Angular and TypeScript Specialist**

+91-8638113906 | thulunga.tb@gmail.com | linkedin.com/in/thulunga | github.com/Thulunga

## PROFESSIONAL SUMMARY

Results-driven Software Developer with **3+ years** building enterprise-grade Angular and TypeScript applications at SOTI Inc., a global MDM leader serving 17,000+ customers. Architect of a **reusable AI-powered chatbot UI package** deployed across multiple products, and performance solutions that handle **5,000+ record data views** at scale. Recognized as **MVP Nominee two consecutive years**. Passionate about clean architecture, high-performance UIs, and full-stack product thinking - demonstrated through independent production-grade projects spanning Next.js, PostgreSQL, and modern SaaS infrastructure.

## EXPERIENCE

**Software Developer I** | **SOTI Inc.** *Gurugram, India | July 2024 - Present*

- Architected and shipped a **reusable AI-powered chatbot Angular package** with configurable theming and plug-and-play integration across multiple enterprise products, eliminating per-product UI re-implementation.
- Engineered frontend performance for screens rendering **5,000+ records** using virtual scrolling, OnPush change detection, and custom rendering strategies, delivering smooth UX on enterprise hardware.
- Designed scalable Angular module architecture with **RxJS-based state management**, reducing unnecessary re-renders and improving responsiveness across complex data views.
- Drove cross-functional delivery as the primary frontend liaison between Product, Design, and Backend, translating ambiguous requirements into **WCAG-compliant**, accessible interfaces shipped on schedule.
- Contributed to **SDE-1 technical interviews**, shaping hiring standards and onboarding quality for the frontend team.

**Associate Developer** | **SOTI Inc.** *Gurugram, India | August 2022 - June 2024*

- Delivered **10+ reusable Angular UI components** and shared utilities adopted across multiple enterprise modules, reducing code duplication and accelerating feature velocity.
- Resolved high-priority UI bugs and performance regressions in collaboration with senior developers and QA, maintaining release cadence across quarterly cycles.
- Contributed to frontend architecture discussions and code reviews, growing into component design ownership ahead of promotion to Software Developer I.

## INDEPENDENT PROJECTS

**StoreBanao - Production SaaS Platform (storebanao.in)** *2025 - Present*

*Next.js 14, TypeScript, PostgreSQL, Prisma, Clerk, Cloudinary, Razorpay, Turborepo, Vercel, Railway*

- Built a full-stack SaaS enabling Indian D2C sellers to launch online stores with zero technical knowledge - **designed, architected, and shipped solo** from zero to live users in under 3 months.
- Implemented a scalable **multi-language i18n system** with JSON locale files, lazy-loaded translations, localStorage persistence, and SEO-friendly language-based routing.
- Architected a multi-store Clerk webhook system, resolving complex middleware routing conflicts (307 redirect on webhook routes) for reliable auth event processing.
- Designed a Turborepo monorepo with shared packages across storefront, vendor dashboard, and admin panel, enabling code reuse and independent deployments.

**Planningo - All-in-One Productivity Platform (mydailyworkspace.site)** *2025 - Present*

*Next.js, TypeScript, Supabase, PostgreSQL, Row-Level Security, Tailwind CSS*

- Built a cloud-based productivity platform with **six integrated modules**: Todos, Calendar, Day Planner, Reminders, Trip Planner, and Expenses and Budget - all synced in real time across devices.

- Implemented **row-level security** via Supabase for enterprise-grade data isolation, ensuring each user accesses only their own data without any server-side filtering logic.
- Designed a drag-and-drop day planner with time-block scheduling and color-coded calendar events, delivering a mobile-first responsive experience across phone, tablet, and desktop.
- Shipped shared group expense splitting and multi-day trip itinerary builder, enabling real-world collaborative use cases beyond simple task management.

### AI-Powered Chatbot UI Package (SOTI Internal)

*Angular, TypeScript, RxJS*

- Published as a reusable internal Angular package with configurable theming, enabling any product team to integrate via a **single import** with zero UI re-implementation.
- Built reactive conversation state management via RxJS, optimized for low-latency streaming responses and dynamic UI updates.

## TECHNICAL SKILLS

| | |
|---|---|
| **Frontend** | Angular, TypeScript, RxJS, React.js, Next.js 14, HTML5, CSS3, SCSS, Tailwind CSS |
| **Backend** | Node.js, Express.js, REST APIs, Supabase |
| **Database** | PostgreSQL, Prisma ORM, Redis, Supabase (Row-Level Security) |
| **Auth & Payments** | Clerk (multi-tenant, cross-subdomain), Supabase Auth, Razorpay, Webhooks (Svix) |
| **DevOps & Tools** | Vercel, Railway, Turborepo, Git, GitHub, VS Code, Chrome DevTools |
| **Practices** | Component Architecture, State Management, Performance Optimization, Accessibility (WCAG), i18n, Responsive Design, ATS-Optimized Development |

## EDUCATION

**B.Tech in Computer Science and Engineering** | **NIT Calicut (National Institute of Technology)** *Graduated June 2022 | Kerala, India*

## ACHIEVEMENTS

- **MVP Nominee - 2x Consecutive (2024 and 2025)**: Recognized at SOTI Inc. for consistent product impact, end-to-end ownership, and cross-team collaboration.
- Shipped **two production SaaS platforms solo** - StoreBanao and Planningo - while holding a full-time Software Developer I role.
